

Product Notification

Dear Valued Customer,

To optimize Invitek Molecular's production streamline and also to simplify the ordering process of the PSP® Stool product line, we now offer products for lysis, storage, sampling and extraction in a flexible, modular system that can be individually adapted to different applications and uses.

Our PSP® Spin Stool DNA Basic Kit is the foundation of the modular principle. This kit contains all components necessary for sample extraction except the lysis buffer (Stool DNA Stabilizer). Based on the Basic Kit, the Stool DNA Stabilizer can be added alone or prefilled in Stool Collection Tubes, depending on the application.

We hereby inform you that the products PSP® Spin Stool DNA Kit, Art. No.: 1038100300 and the PSP® Spin Stool DNA Plus Kit, Art. No.: 1038110300, as a single kit are no longer available. Please refer to the table below for the new ordering information.

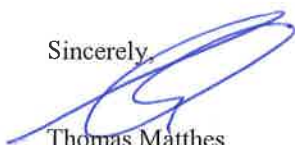

Ordering Information:

Kit	Description	Catalogue number
PSP® Spin Stool DNA Basic Kit	250 purifications Extraction kit, without DNA Stabilization Buffer for sample lysis	1038120300
Combine the PSP® Spin Stool DNA Basic Kit with the following options for sample lysis or complete sample management:		
Stool DNA Stabilizer (Replacement for Lysis Buffer P)	250 ml (2x) Stool transport and recovery buffer for stabilization of nucleic acids and sample lysis	1038111100
Stool Collection Tube with Stabilizer	250 tubes Convinient module for sample collection, stabilization, transport, storage and lysis.	1038111300

All current open orders will be delivered according to our new kit packaging, prices are applicable as confirmed.

If you have any questions, please feel free to contact us at any time! We are looking forward to your message or your call. This is how you can reach us: Email: info@invitek-molecular.com ,Phone: + 49 30 9489 290

Sincerely,

Thomas Matthes
